

A clearer brief. A better starting point.

ARTWORK & QUOTATION CHECKLIST

1. Choose your product

Tell us whether you need labels, patches, printed branding, hang tags or packaging. Describe the garment or surface where it will be used.

2. Show the finished dimensions

Use millimetres, label the width and height, and mark folds, sewing allowance, border and hardware positions. Packaging needs depth and a clear internal/external dimension reference.

3. Supply clear artwork

Send the original editable/vector file where available. Reference photographs are useful but do not replace measured dimensions. Tell us the colour references and which parts must remain legible. Quote-form uploads accept PDF, PNG, JPG and WebP; the studio logo preview accepts PNG, JPG and WebP.

4. Include quantity and destination

Specify pieces per design, colour or size, delivery country and any deadline. Ask for sample arrangements and applicable MOQ in the quotation.

5. Agree the construction

Review material, fold, cut, backing, border and expected use. Raise testing or documentation requirements before material selection.

6. Keep the approval record

The concept preview is not a production proof. Confirm the artwork, construction, quotation, sample requirements and delivery terms before production approval.
